

**What they do.**

aquista specialise in sourcing professional, executive and management level candidates for blue-chip companies and multi-national organisations.

**What we do for them.**

the collective and aquista have a relationship that dates back to 2001. Since then, we have developed their corporate identity, producing style guidelines, colour palettes, signage and a full suite of stationery and support material. We have gone on to design and develop two stages of the website, with full integration to the office management system and recruitment tool, and provide on-going support and maintenance. On a weekly basis, we provide aquista with advertising and marketing services, as well supporting their sister companies. With their recruitment advertising projects, we offer a full typesetting facility, setting and dispatching artwork for trade and national press, resulting in a very good record for quick, accurate and cost effective solutions.

**Process Engineer**  
Derbyshire ◯ Highly competitive package

A candidate briefing pack is available at [www.aquista.com](http://www.aquista.com) (type A021003 into 'quick link' box on menu bar) or by calling our 24/7 helpline on 0870 842000. For an informal chat, contact our consultant Adrian Dally, on 0870 842000.

Unit 3 Scapine House, Hornbeam Park, ...

Can you optimise and develop production processes so that we continue to deliver quality products and services to our customers? Do you seek career progression with a respected, multi-national minerals processing company? Omva UK is a leading supplier of industrial minerals and chemicals and is part of the Omva group which operates 130 plants in 30 countries. Omva UK supplies an extensive range of products and services to manufacturing clients in the paint, plastics and paper industries. Due to an internal promotion, we seek a Process Engineer to provide services to our industrial mineral filter production sites across the UK. Reporting to the Production Director you will work closely with Plant Managers to optimise existing and develop new production processes that will ensure high product quality whilst maximising efficiency. Other key responsibilities include: taking ownership for new design through to commissioning; and the optimisation, design of equipment.

Requirements for this challenging role include a degree in chemical mineral processing, and experience of process engineering. It is also to have worked in a powder processing environment and have automated control systems. We offer a competitive salary, excellent benefits, a generous pension package and a working culture that values your contribution. We could lead to more senior positions in production management.

**Is it fun?**

Being involved in the development of a new company right from the start is extremely satisfying, and to play such an integral role in the development of aquista's brand design and corporate look has been an exciting project for the collective. We are also extremely proud that our relationship is now nearing its eighth year and is as strong as ever.

If you'd like to find out more about what we could do for your business or to discuss any design and print projects, please contact Matt on **01727 893 697 / 07768 472 365** or [matt@thecollectivedesign.co.uk](mailto:matt@thecollectivedesign.co.uk)
